

## KVM Cluster Expansion

### Questions & Answers

---

Q1	Server : We recommend having 32 Gb/s FC connectivity to maximize the benefit from the NVMe drives requested
A1	<b>The requested is 16 Gb/s , any higher specs are accepted as well.</b>
Q2	SAN Switch Please advise if the SAN switches exist at MoDEE, or the setup will be direct connection to SAN
A2	<b>Direct connection to SAN</b>
Q3	Please note that we are not able to provide a specific commitment regarding resolution time as it varies based on the complexity of each case, and some issues may require more time for resolution, especially in the case of software-related matters. However, we can commit to a specific response time. Kindly approve this approach
A3	<b>Accepted</b>
Q4	Required Hard Drives “mixed use” are not available for OS boot HDDs, can we propose “read intensive” HDDs which are better for OS (price and performance)
A4	<b>Accepted</b>
